DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of claim 1 is vague and indefinite because it omits the essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. Similar problem exists for the recitation of claims 6, 9 and 10.

The recitation of "can use" recited in claim 5, line 2 is vague and indefinite because it is not a positive limitation. Similar problem exists for the same recitation recited in claim 8, line 2.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 2611

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (US 6,219,378; art cited by applicant) in view of Shattil (US 2003/0147655).

Regarding claims 1-10, Wu, as shown in figures 4 and 6-9, teaches all subject matter claimed except for the multiplying the transmission data of a sub-carrier by gain and phase compensation data. See also Wu: column 7, line 44 to column 18, line 60. However, Shattil, from the same field of endeavor, teaches multiplying the transmission data of a sub-carrier by gain and phase compensation data. See Shattil: [0143] – [0145]; [0151]; and [0204] – [0206]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the modem system of Wu by providing the gain and phase compensation data as taught by Shattil so that to enhance the performance of the communications since phase offset and gain are compensated before transmission.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Felts, III (US 2002/0105595) and Saed (US 2005/0018787) are cited because they are pertinent to modem.
